

## PRIMATIO

PROVINCE OF PAVIA NEBBIOLO  
regional geographical indication

VINTAGE  
2019

TYPE  
Red, aged 12 months in barrique

COLOUR  
Ruby red tending to garnet

GRAPES  
Nebbiolo

ALCOHOL  
15% vol

NOSE  
Fruity and dried flowers, fine spicy fragrances

PALATE  
Full body, complex, balanced, good texture and long persistence

FOOD SUGGESTIONS  
Salami, first and second tasty dishes, braised beef, grilled meat, seasoned cheeses

SERVICE  
Open 1 hour in advance and serve at 18-20 °C in large glasses, like balloons

CELLARING  
10+ years

NOTES  
*Non filtered, presence of lees is a natural process and it is an indication of a genuine product*

## PRIMATIO 2019

### Our reality

Bricco dei Roncotti is the name of the hill where our vineyards are located. We are in an area of sandstones, even outcropping, the altitude is between 150 and 230 m asl, the exposure of the vineyards is west, the soils are made up of light crumbly marls, with small lenses of red clays, chalky substrates and fine sands. Ours is recognized as heroic viticulture due to the very high slope, extreme environmental conditions that can only be faced with great passion and dedication.

### Our philosophy

We cultivated our vineyard with tenacity and respect for nature, following an agricultural integrated production, contributing in a significant way to the conservation of biodiversity and improving the environment sustainability of our product. The land slope and exposure, the unique terroir, the high number of vines per hectare, the poor water availability, the permanent grass cover, the short and accurate pruning in winter, the green operations in spring and summer lead to manage the vineyard in the best way to have superior grapes quality.

### Climate

Because of a dry Winter and a hot March, the vegetative season started early. April and mainly May were cold, so the vines slowed down growth and the water supply of the land was restored. Hot June brought a sudden and intense development of the vegetation recovering the previous slowdown. Hot July but also characterized by some rains favored a regular development of the vines. Strong temperature excursion in the last days before harvest ensured an adequate maturation of the grapes and the maintenance of freshness.

### Harvest

Harvesting is strictly manual and performed at the optimal point of maturation and only the best grapes are transformed in wine. The harvest took place October 13<sup>th</sup>, two weeks late compared to the average of previous years. Grape ripening was optimal for its aromatic and tasteful components.

### Vinification

Crushed fresh and healthy grapes, regular fermentation punching down skins or pumping over 1-2 times a day. Alcoholic fermentation took place in stainless steel tanks at a temperature between 23 and 28 °C. Racking after 1 month, gentle press of the skins and aging in stainless steel tanks. During winter the wine is pumped into oak wood barrels, where he stayed for 12 months with periodic batonnage. Further period in steel before bottling and final refinement in the bottle.
